POOLFILTERSNOW

Pool maintenance calendar

Online, with updates

The routine that keeps the water clear: weekly, monthly and seasonal jobs.

Spring opening

Spring opening

Remove cover, top up water · Clean or replace the cartridge · Balance chemistry, then shock · Run the pump 8-12 hours a day

Every week

Every week

Test and adjust chlorine and pH · Skim, brush and vacuum · Empty skimmer and pump baskets · Check filter pressure

Every month

Every month

Test alkalinity, calcium and stabilizer · Clean the cartridge (or sooner if pressure rises) · Inspect O-rings and hoses

Fall closing

Fall closing

Deep-clean the cartridge and let it dry · Balance water and add winter chemicals · Lower water level if you freeze · Blow out lines, cover the pool
